Data sheet

## PHILIPP Sealing cap (plastic)

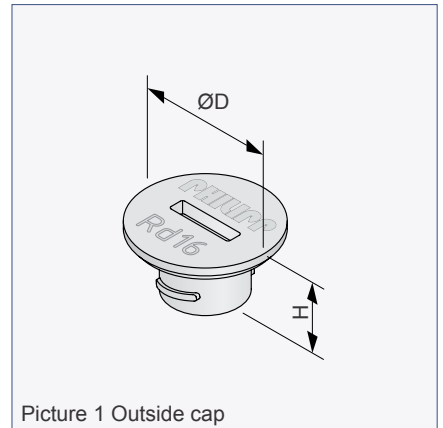

The Sealing caps (plastic) are used to close female threads. They can be used for all sizes of the Threaded anchor system regardless of whether a Nailing plate is used or the thread is installed flush to the surface. Therefore, the penetration of dirt is not possible using the Sealing caps. A permanent corrosion protection is only partially given as a penetration of water into the sealed socket cannot be excluded.

The Sealing cap (plastic) (72KAS\_) cannot be combined with Marking rings at all (Picture 4).

**Table 1: Dimensions Outside cap**

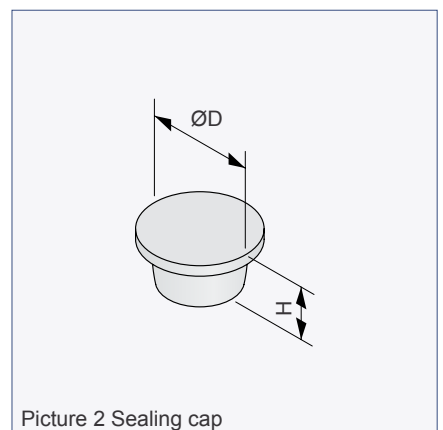

Ref.-No.	Type [RD/M]	ØD [mm]	H [mm]	Colours	Weight [kg/100 pcs.]
72ASS12	12	18	10	Concrete grey	0.06
72ASS14	14	21	12	Concrete grey	0.11
72ASS16	16	25	13	Concrete grey	0.14
72ASS18	18	28	14	Concrete grey	0.19
72ASS20	20	34	15	Concrete grey	0.29
72ASS24	24	35	17	Concrete grey	0.38
72ASS30	30	42	19	Concrete grey	0.53
72ASS36	36	52	19	Concrete grey	0.73
72ASS42	42	60	20	Concrete grey	0.96
72ASS52	52	73	22	Concrete grey	1.33
